Siemens Home Appliances

For a century, Siemens has been shaping the way you cook and live at home. In 2026, we celebrate 100 years of oven innovation – a journey that began in 1926 with the People's Cooker, a pioneering invention that transformed kitchens and redefined everyday cooking.

A century of visionary progress

Since its founding in 1847, Siemens has stood for inventive spirit, openness, and a deep understanding of people's needs. As electricity spread into German homes in the 1920s, Siemens recognised an opportunity to make daily life easier and safer. In 1926, the company introduced the People's Cooker, featuring the first "baking tube" – a tube with a heating coil. For the first time, families could prepare their Sunday roast electrically, without wood or coal. This marked the birth of Siemens ovens and the beginning of a new era in home cooking.

Over the decades, Siemens has continued to set benchmarks in technology and design. From the first-ever universal built-in cooker in 1962, who marked a milestone in the evolution of the modern kitchen, over the revolutionary pyrolytic self-cleaning function, introduced in the 1970s, or the launch of Europe's first compact combination of microwave and conventional oven in 1984, to today's ovens with integrated cameras and AI-powered functions, Siemens ovens have been a trusted partner in millions of households.

And as we step into the next century of oven evolution, the mission remains clear: to push boundaries, ask bold questions, and craft intelligent innovations that shape the future of cooking – making life at home more enjoyable, connected, and inspiring.

Siemens Home Appliances

100 years of Siemens ovens

Crafting intelligent

innovations since 1926

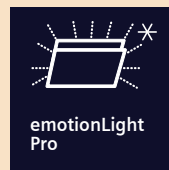

A design that takes your breath away.

With fresh air guaranteed at all times.

A perfect shape: For a perfect airflow.
Seamlessly integrated and rising only when required, glassdraftAir combines refined design with Guided Air technology to ensure precise, quiet extraction and a clear, open kitchen experience.

Colour becomes atmosphere: emotionLight Pro.
More than decoration, emotionLight Pro lets you set coloured accents to match your mood or kitchen ambience. Choose from nine presets or create your own via the Home Connect app.

Attuned to each other: cookConnect and climateControl sensor.
Hob and hood work in sync, activating automatically and adjusting extraction precisely to steam and odours.

Easy maintenance
Easy to clean, dishwasher suitable grease filters that can be accessed at the touch of a button.

Kitchen design

with no limits

The perfect symbiosis of cooktop, ventilation and inspiration.

The inductionAir System combines two great appliances: a flexInduction Cooktop and the revolutionary new integrated ventilation. Thanks to this space-saving concept, you can enjoy more freedom and create a kitchen based on your personal vision. And when this vision has become reality, the exciting part only begins. Your daily cooking experience will also be more convenient and enjoyable.

Designed to impress

The design of the inductionAir System reflects a deep understanding of the modern kitchen concepts: Cooktop and ventilation merge into one appliance that is both refined and eye-catching. Above all, the ventilation keeps in line with the design of the cooktop and its user interface: complex in its idea, yet simple in the execution.

Pays attention to your pans: fryingSensor Plus

Sensors in the cooktop measure the pan's temperature. Once a desired heat level has been reached, you receive a signal and the pan stays at that very level. Without worries and scorching, you always get the best results.

Installed to save space

The inductionAir System is easy to install and doesn't require much room inside the lower cabinet of your worktop to allow you to install standard drawers. This way, you will keep necessary storage space for your cookware and other kitchen utensils. Whatever you plan to do with your kitchen: the inductionAir System will make it possible.

Powerful and quiet: iQdrive motor

The iQdrive motor is always up to the task of removing unpleasant kitchen odours. Thanks to its brushless mechanism, the motor is outstandingly long-lasting, efficient and quiet.

Intelligent Gas Hobs Comfort that follows your flame

The iQ700 gas hob includes hob-hood connectivity features that make cooking more seamless and intuitive. For example, when you fire up the hob the hood turns on automatically and you can easily adjust the hood's light and power level, and set the timer, directly on the hob's touch display. With Siemens home appliances, connectivity goes beyond convenience. It also gives you peace of mind, knowing you can check on your hob from anywhere and get streamlined support via the Siemens Home Appliances app.

Intelligent hood automatic: intelligently connected for ultimate control.

The hood adjusts its fan level to match the size of the flames.

cookConnect system: control your hood from your hob.

Adjust the power and lighting on the hob or via Siemens Home Appliances app.

Illuminated & Detachable knobs: turn convenience all the way up.

Clean quickly and easily with no hard-to-reach areas.

stepFlame-technology: No more guessing, say hello to precision.

Nine precise flame levels for accurate heat control-cook with confidence and creativity

New Launching soon

Hoods

The All-New Range of Inclined Hoods

cookConnect System

Fire up the hob, and the hood turns on automatically

Do you want to bring your cooking to the next level? How about a hob that automatically interacts with the hood? We call it intelligent hood automatic: The hood matches the fan level to the temperature and power of the hob, allowing you to cook from start to finish without ever touching the hood. Simply pair both appliances with the Home Connect app to benefit from this automated cooking feature. Intelligent hood automatic is available on new 90cm hobs in combination with our new inclined hoods.

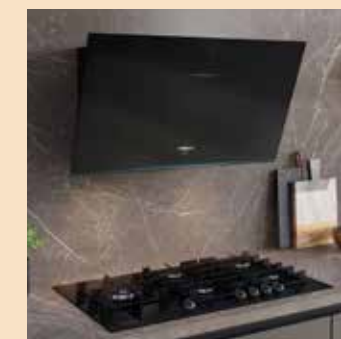

Before you cook

Thanks to the cookConnect System, the moment you activate the hob, your hood switches itself on - illuminating your cooking area and matching the extraction rate to the heat level that you have selected.

During cooking

While cooking, your hob stays in constant communication with the hood. This allows the hood to react to your every move, automatically increasing and decreasing the extraction rate as you add and remove heat from pots and pans. Of course, you can manually adjust the fan speed and change the light settings at any point.

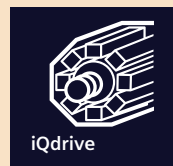

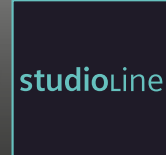

When you are finished

Once you are done, the hood will switch itself to the automatic afterrun function. You can set the afterrun duration and decide if you want the hood light to stay on or turn off automatically in the Home Connect app.

Design that leads. Control that listens.

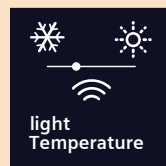

The iQ700 wall-mounted cooker hood redefines kitchen sophistication and performance. With its sleek design and powerful functionalities, it effortlessly elevates your cooking experience. The adjustable features ensure personalized usage, while its contemporary look seamlessly integrates into your kitchen's aesthetic. Voice control adds an extra layer of convenience, making it an indispensable tool for culinary enthusiasts seeking both style and efficiency in their cooking space.

iQdrive motor:
The quiet, high-performance motor ensures efficient removal of odours and steam.

cookConnect system:
Use your hob to control your hood's power level and lighting.

LED light with adjustable light temperature:
Optimal visibility for your cooking adventures.

Upgrade your lifestyle with Siemens Dishwashers

Zeolith®: A leap in super-efficient drying technology

Faster drying and lower energy consumption naturally
The dishwasher features a special container of Zeolith®, a mineral with the ability to absorb moisture and convert it into heat. It facilitates a faster drying process, which reduces time taken and energy consumed. This brings the energy consumption down to 0.73 kWh - the world's best energy consumption. Hence the Siemens dishwasher has been awarded the 'Innovative Prize for Climate and Environment' by the German government.

Lifelong drying The Zeolith® minerals are stored in the depths of the dishwasher and thanks to the regeneration process, it keeps on working for the entire lifetime of the dishwasher.
